Washington - Mathematics - Grades 9-12		
Grade:	Geometry	
Section	Description	Lesson Title
MA.9-12.G.1.A	Distinguish between inductive and deductive reasoning.	Inductive and Deductive Reasoning
	Use inductive reasoning to make conjectures, to test the	
	plausibility of a geometric statement, and to help find a	
MA.9-12.G.1.B	counterexample.	Inductive and Deductive Reasoning
	Use deductive reasoning to prove that a valid geometric	
MA.9-12.G.1.C	statement is true.	Inductive and Deductive Reasoning
	Know, prove, and apply the Pythagorean Theorem and its	
MA.9-12.G.3.D	converse.	Pythagorean Theorem
	Describe prisms, pyramids, parallelepipeds, tetrahedra, and	
	regular polynedra in terms of their faces, edges, vertices, and	Canadianta Creaka
MA.9-12.G.3.J	properties.	Coordinate Graphs
	Determine the equation of a line in the coordinate plane that is	
	described accomptricely including a line through two given	
	described geometrically, including a line through two given	
	a line through a given point perpendicular to a given line, and	Parallel Lines
MA.9-12.0.4.A	Sketch results of transformations and compositions of	
	transformations for a given two-dimensional figure on the	
	coordinate plane, and describe the rule(s) for performing	
	translations or for performing reflections about the coordinate	Transformations and Congruent
MA.9-12.G.5.A	axes or the line $v = x$.	Figures
		Transformations and Congruent
MA.9-12.G.5.B	Determine and apply properties of transformations.	Figures
	Given two congruent or similar figures in a coordinate plane,	
	describe a composition of translations, reflections, rotations,	
MA.9-12.G.5.C	and dilations that superimposes one figure on the other.	Coordinate Graphs
	Given two congruent or similar figures in a coordinate plane,	
	describe a composition of translations, reflections, rotations,	Transformations and Congruent
MA.9-12.G.5.C	and dilations that superimposes one figure on the other.	Figures
	Describe the symmetries of two-dimensional figures and	
	describe transformations, including reflections across a line	Transformations and Congruent
MA.9-12.G.5.D	and rotations about a point.	Figures
	Analyze distance and angle measures on a sphere and apply	
MA.9-12.G.6.B	these measurements to the geometry of the earth.	Complex 3D Objects
	Analyze distance and angle measures on a sphere and apply	Surface Area and Volume: 3D
MA.9-12.G.0.D	Apply formulas for surface area and volume of three.	riguies
	Apply formulas for surface area and volume or three-	Complex 3D Objects
MA.9-12.0.0.0	Apply formulas for surface area and volume of three-	Surface Area and Volume: 3D

ODYSSE	YWARE [®]	
	Alignment Report for Integrated Math I	
	Washington - Mathematics - Grades 9-12	
	Explain the meaning of the square root of a number, including	
MA.11-12.1.1.1.a	why negative numbers have no real square roots.	Simplifying Radicals
	Explain the meaning of negative integer exponents and	
MA.11-12.1.1.1.c	provides examples.	Dividing with Like Bases
	Compare and order real numbers without a calculator using	
	relationships between integers, and the effects of radicals and	
MA 11-12 1 1 2 a	rational exponents on those relationships	Classifying and Comparing Numbers
	Compare and order real numbers without a calculator using	
	relationships between integers, and the effects of radicals and	
MA.11-12.1.1.2.a	rational exponents on those relationships.	Multiplying Radicals
	Find the integral or simple fractional powers of rational	
MA 11-12 1 1 5 c	numbers	A Product to a Power
	Find the integral or simple fractional powers of rational	
MA.11-12.1.1.5.c	numbers.	Dividing with Like Bases
MA.11-12.1.1.6.a	Compute using rational numbers.	Fractions
MA.11-12.1.1.6.a	Compute using rational numbers.	Signed Numbers
MA.11-12.1.1.6.b	Compute using scientific notation.	Scientific Notation
	Compute using basic properties of exponents and logarithms	
MA.11-12.1.1.6.c	to solve problems.	A Product to a Power
	Compute using basic properties of exponents and logarithms	
MA.11-12.1.1.6.c	to solve problems.	Dividing with Like Bases
	Complete multi-step computations using the order of	
	operations and the properties of operations (associative.	
	commutative, distributive, etc.) using combinations of real	
MA.11-12.1.1.6.d	numbers.	Evaluating Expressions
	Recall and interpret definitions and basic properties of	
	congruent and similar triangles, circles, guadrilaterals.	
	polygons, parallel, perpendicular, and intersecting lines, and	
MA.11-12.1.3.1.b	associated angle relationships.	Angle Relationship Definitions
	Recall and interpret definitions and basic properties of	
	congruent and similar triangles, circles, guadrilaterals.	
	polygons, parallel, perpendicular, and intersecting lines, and	
MA.11-12.1.3.1.b	associated angle relationships.	Central Angle and Arc Measure
	Recall and interpret definitions and basic properties of	
	congruent and similar triangles, circles, guadrilaterals.	
	polygons, parallel, perpendicular, and intersecting lines, and	
MA.11-12.1.3.1.b	associated angle relationships.	Congruence
	Recall and interpret definitions and basic properties of	
	congruent and similar triangles, circles, guadrilaterals.	
	polygons, parallel, perpendicular, and intersecting lines, and	
MA.11-12.1.3.1.b	associated angle relationships.	Parallel Lines and Transversals
MA.11-12.1.3.1.c	Analyze properties of circles and spheres.	Central Angle and Arc Measure
	Distinguish between area and perimeter of 2-D figures.	<u> </u>
MA.11-12.1.3.2.c	surface area, and volume of 3-D figures.	Surface Area
	Distinguish between area and perimeter of 2-D figures,	
MA.11-12.1.3.2.c	surface area, and volume of 3-D figures.	The Cylinder and Sphere
	Distinguish between area and perimeter of 2-D figures.	
MA.11-12.1.3.2.c	surface area, and volume of 3-D figures.	The Trapezoid
	Distinguish between area and perimeter of 2-D figures.	
MA.11-12.1.3.2.c	surface area, and volume of 3-D figures.	Triangle Properties
	Distinguish between area and perimeter of 2-D figures.	<u> </u>
MA.11-12.1.3.2.c	surface area, and volume of 3-D figures.	Volume
	Calculate the area and perimeter of circles. triangles.	
MA.11-12.1.3.2.d	quadrilaterals, and regular polygons.	Area and Sectors

ODYSSEY WARE [®]

MA.11-12.1.2.5.d	problems about measure of angles.	Quotient Relations
	Use sine, cosine or tangent in a right triangle to solve	
MA.11-12.1.2.5.d	problems about measure of angles.	Reduction Formulas
	Interpret and use the identity $sin^2(theta) + cos^2(theta) = 1$ for	
	angles between 0° and 90°; recognize this identity as a special	Additional Sum and Difference
MA.11-12.1.2.5.e	representation of the Pythagorean Theorem.	Formulas
	Interpret and use the identity sin ² (theta)+ cos ² (theta) = 1 for	
	angles between 0° and 90°; recognize this identity as a special	
MA.11-12.1.2.5.e	representation of the Pythagorean Theorem.	Identities
	Interpret and use the identity $sin^2(theta) + cos^2(theta) = 1$ for	
	angles between 0° and 90°; recognize this identity as a special	
MA.11-12.1.2.5.e	representation of the Pythagorean Theorem.	Pythagorean Relations

ODYSSE	EYWARE [®]	
	Alignment Report for Pre-calculus	
	Washington - Mathematics - Grades 9-12	
	Interpret and use the identity $\sin^2(\text{theta}) + \cos^2(\text{theta}) - 1$ for	
	angles between 0° and 90° recognize this identity as a special	
MA 11-12125 e	representation of the Pythagorean Theorem	Reciprocal Relations
10070.11112.1.2.0.0	Interpret and use the identity $\sin^2(\text{theta}) + \cos^2(\text{theta}) = 1$ for	
	angles between 0° and 90° . recognize this identity as a special	
MA 11-12 1 2 5 e	representation of the Pythagorean Theorem	Trigonometric Identities
10.7.11112.1.2.0.0	Recall and interpret definitions and basic properties of	
	congruent and similar triangles, circles, guadrilaterals	
	polygons parallel perpendicular and intersecting lines and	
MA.11-12.1.3.1.b	associated angle relationships.	Inclined Plane Application
	Recall and interpret definitions and basic properties of	
	congruent and similar triangles, circles, guadrilaterals.	
	polygons, parallel, perpendicular, and intersecting lines, and	
MA.11-12.1.3.1.b	associated angle relationships.	Radian Measure
MA.11-12.1.3.1.c	Analyze properties of circles and spheres.	Radian Measure
	Use basic 2-D figures such as circles or polygons to represent	
MA.11-12.1.3.3.a	objects essential to a situation.	Inclined Plane Application
	Introduce a coordinate system when useful for describing the	
MA.11-12.1.3.3.c	position of objects in a situation.	Applications
	Introduce a coordinate system when useful for describing the	
MA.11-12.1.3.3.c	position of objects in a situation.	Inclined Plane Application
	Introduce a coordinate system when useful for describing the	
MA.11-12.1.3.3.c	position of objects in a situation.	Ordered-Pair Numbers: Relations
	Introduce a coordinate system when useful for describing the	
MA.11-12.1.3.3.c	position of objects in a situation.	The Ellipse Applied
	Describe the relative location of objects based on their	Converting Cartesian Equations to
MA.11-12.1.3.3.e	coordinates.	Polar Equations
	Describe the relative location of objects based on their	Converting Polar Equations to
MA.11-12.1.3.3.e	coordinates.	Cartesian Equations
	Describe the relative location of objects based on their	
MA.11-12.1.3.3.e	coordinates.	Graphing Polar Equations
	Describe and apply the concepts of complementary, mutually	
MA.11-12.1.4.2.a	exclusive, independent, and compound events.	Addition of Probabilities
	Describe and apply the concepts of complementary, mutually	Definitions, Sample Spaces, and
MA.11-12.1.4.2.a	exclusive, independent, and compound events.	Probability
	Describe and apply the concepts of complementary, mutually	
MA.11-12.1.4.2.a	exclusive, independent, and compound events.	Multiplication of Probabilities
	Describe and apply the concepts of complementary, mutually	
MA.11-12.1.4.2.a	exclusive, independent, and compound events.	Navigation Application
	Describe and apply the concepts of complementary, mutually	
MA.11-12.1.4.2.a	exclusive, independent, and compound events.	Review Mathematics 1209 and 1210
	Describe and apply the concepts of complementary, mutually	
MA.11-12.1.4.2.a	exclusive, independent, and compound events.	The Ellipse Applied
	Describe and apply procedures for computing and comparing	Definitions, Sample Spaces, and
MA.11-12.1.4.2.b	Theoretical probabilities and empirical/experimental results.	Probability
	Describe and each procedures for some time and some of a	
	theoretical probabilities and ampirical/our arimental results	Poviow Mathematics 1990 and 1910
IVIA.11-12.1.4.2.D	Describe and apply precedures for counting techniques such	
	as the Eurodemontal Counting Principle, permutations, and	
MA 11 12 1 4 2 a	combinations	Circular Permutations
