	Washington - Science - Grades 3-5	
	Give examples of simple living and physical systems (e.g., a	
	whole animal or plant a car a doll a table and chair set). For	
SCI 2 2 1 2 2 SVSA 1	each example, explain how different parts make up the whole	Experiment: Watch the Seeds Grow
301.2-3.1.2-3 313A.1	Predict what may bappen to an object, plant, or animal if one	Experiment. Watch the Seeds Glow
	or more of its parts are removed (e.g., a tricycle cannot be	
	ridden if ite wheele are remeved	Mammala
501.2-3.1.2-3 515B.1	Dradict what may be near to an abject, plant, or animal if and	Mammais
	Predict what may happen to an object, plant, or animal if one	
	of more of its parts are removed (e.g., a they de cannot be	Diant Darta
501.2-3.1.2-3 515B.1	Dradict what may be near to an abject, plant, or animal if and	Plant Parts
	Predict what may happen to an object, plant, or animal if one	
	of more of its parts are removed (e.g., a they de cannot be	Draigate Aguarium
SUI.2-3.1.2-3 SYSB.1	ridden if its wheels are removed).	Project: Aquarium
	Predict what may happen to an object, plant, or animal if one	
	or more of its parts are removed (e.g., a tricycle cannot be	Drenerties of Motton
SUI.2-3.1.2-3 SYSB.1	ridden if its wheels are removed).	Properties of Matter
	Predict what may happen to an object, plant, or animal if one	
	or more of its parts are removed (e.g., a tricycle cannot be	
SUI.2-3.1.2-3 SYSB.1	ridden if its wheels are removed).	Special Mammals
	Contrast the function of a whole object, plant, or animal with	
	the function of one of its parts (e.g., an airplane can fly, but	
	wings and propeller alone cannot; plants can grow, but stems	
SCI.2-3.1.2-3 SYSC.1	and flowers alone cannot).	Mammals
	Contrast the function of a whole object, plant, or animal with	
	the function of one of its parts (e.g., an airplane can fly, but	
	wings and propeller alone cannot; plants can grow, but stems	
SCI.2-3.1.2-3 SYSC.1	and flowers alone cannot).	Plant Parts
	Contrast the function of a whole object, plant, or animal with	
	the function of one of its parts (e.g., an airplane can fly, but	
	wings and propeller alone cannot; plants can grow, but stems	
SCI.2-3.1.2-3 SYSC.1	and flowers alone cannot).	Project: Aquarium
	Contrast the function of a whole object, plant, or animal with	
	the function of one of its parts (e.g., an airplane can fly, but	
	wings and propeller alone cannot; plants can grow, but stems	
SCI.2-3.1.2-3 SYSC.1	and flowers alone cannot).	Properties of Matter
	Contrast the function of a whole object, plant, or animal with	
	the function of one of its parts (e.g., an airplane can fly, but	
	wings and propeller alone cannot; plants can grow, but stems	
SCI.2-3.1.2-3 SYSC.1	and flowers alone cannot).	Special Mammals
	Identify ways that similar parts can play different roles in	
	different systems (e.g., birds may use their beaks to crack	
SCI.2-3.1.2-3 SYSE.1	seeds while other birds use their beaks to catch fish).	Experiment: Watch the Seeds Grow
	Explain how observations can lead to new knowledge and	
SCI.2-3.2.2-3 INQA.1	new questions about the natural world.	Experiment: Different Times
	Explain how observations can lead to new knowledge and	
SCI.2-3.2.2-3 INQA.1	new questions about the natural world.	Experiment: Is Air Matter?

Grade:	Grade 5	
Section	Description	Lesson Title
	Describe how one part of Earth's system depends on or	
	connects to another part of Earth's system (e.g., Puget Sound	
SCI.5.1.2.4.a	water affects the air over Seattle).	Plate Tectonics
	Identify and describe various landmasses, bodies of water,	
	and landforms (e.g., illustrate continents, oceans, seas, rivers,	
SCI.5.1.2.4.b	mountains, plains from a globe and a map).	Fossil Formation: Local Deposits
	Identify and describe various landmasses, bodies of water,	
	and landforms (e.g., illustrate continents, oceans, seas, rivers,	
SCI.5.1.2.4.b	mountains, plains from a globe and a map).	Landforms
	Identify and describe various landmasses, bodies of water,	
00154045	and landforms (e.g., illustrate continents, oceans, seas, rivers,	Maxima
SCI.5.1.2.4.D	mountains, plains from a globe and a map).	Mountains
	Identify and describe various landmasses, bodies of water,	
SCI 5 1 2 4 b	and landroims (e.g., illustrate continents, oceans, seas, ilvers,	Ossana
501.5.1.2.4.0	Identify and deparibe various landmasses, bodies of water	Oceans
	and landforms (o.g., illustrate continents, occase, soos, rivers	
SCI 5 1 2 4 h	mountains, plains from a globe and a man)	Project: Landforms
301.3.1.2.4.0	Identify and describe various landmasses bodies of water	
	and landforms (a d illustrate continents oceans seas rivers	
SCI 5 1 2 4 h	mountains, plains from a globe and a map)	The Earth: Changes in the Earth
001.0.1.2.4.0	Construct a model that demonstrates understanding of Earth's	
	structure as a system made of parts (e.g., solid surface, water,	
SCI.5.1.2.4.c	atmosphere).	Fossil Formation: Local Deposits
	Construct a model that demonstrates understanding of Earth's	
	structure as a system made of parts (e.g., solid surface, water.	
SCI.5.1.2.4.c	atmosphere).	Internal Structures
	Construct a model that demonstrates understanding of Earth's	
	structure as a system made of parts (e.g., solid surface, water,	
SCI.5.1.2.4.c	atmosphere).	Layers of the Earth (Part 2)
	Construct a model that demonstrates understanding of Earth's	
	structure as a system made of parts (e.g., solid surface, water,	
SCI.5.1.2.4.c	atmosphere).	Oceans
	Investigate and report how a larger force acting on an object	
	causes a greater change in motion of that object, 2nd Law of	
	Motion (e.g., a 2-Newton pull causes a toy car to speed up	
SCI.5.1.3.2.a	more than a 1-Newton force).	Kinds of Rocks
	Observe and describe how a substance is the same	
	substance before and after heating or cooling (e.g., solid	
	candle wax can be heated to become liquid candle wax then	
SCI.5.1.3.3.a	cooled back to the same solid candle wax).	Experiment: Sunlight
	Observe and describe how a substance is the same	
	substance before and atter heating or cooling (e.g., solid	
	candle wax can be heated to become liquid candle wax then	
SCI.5.1.3.3.a	cooled back to the same solid candle wax).	iviatter: Conservation

	Describe how two different substances can form a simple	
	chemical reaction to produce new substances (e.g., baking	
SCI.5.1.3.3.b	soda and vinegar react to form a gas).	Matter: Changes in Matter
	Describe how two different substances can form a simple	-
	chemical reaction to produce new substances (e.g., baking	
SCI.5.1.3.3.b	soda and vinegar react to form a gas).	Order: Matter
	Describe how weathering and erosion change the surface of	
SCI.5.1.3.4.a	the Earth.	Erosion and Sediment
	Describe how weathering and erosion change the surface of	
SCI.5.1.3.4.a	the Earth.	Plate Tectonics
	Describe how weathering and erosion change the surface of	
SCI.5.1.3.4.a	the Earth.	Results of Forces
	Describe how weathering and erosion change the surface of	
SCI.5.1.3.4.a	the Earth.	Surface Forces (Part 2)
	Describe how earthquakes, landslides, and volcanic eruptions	
SCI.5.1.3.4.b	change Earth's surface.	Essay: Volcanic Eruptions
	Describe how earthquakes, landslides, and volcanic eruptions	
SCI.5.1.3.4.b	change Earth's surface.	Forces From Under the Surface
	Describe how earthquakes, landslides, and volcanic eruptions	Forces From Under the Surface (Part
SCI.5.1.3.4.b	change Earth's surface.	2)
	Describe how earthquakes, landslides, and volcanic eruptions	
SCI.5.1.3.4.b	change Earth's surface.	Internal Structures
	Describe how earthquakes, landslides, and volcanic eruptions	
SCI.5.1.3.4.b	change Earth's surface.	Plate Tectonics
	Describe how earthquakes, landslides, and volcanic eruptions	
SCI.5.1.3.4.b	change Earth's surface.	Project: Volcano Summary
	Describe now earthquakes, landslides, and volcanic eruptions	The Forth, Changes in the Forth
SCI.5.1.3.4.0	Observe and describe a fassilin a reak	Fine Earth. Changes in the Earth
SCI.5.1.3.5.a	Observe and describe a fossil in a rock.	Experiment. Fossis
SCI 5 1 3 5 a	Observe and describe a fossil in a rock.	Fossil Formation: Location

Section	Description	Lesson Title
	Identify an unknown substance using the properties of a	
SCI.8.1.1.1.a	known substance.	Clouds and Precipitation
	Recognize that the mass of an object is the same when	
SCI.8.1.1.1.b	measured anywhere in the universe at any normal speed.	Future Exploration
	Recognize that the mass of an object is the same when	
SCI.8.1.1.1.b	measured anywhere in the universe at any normal speed.	Project: Identifying Galaxies
	Describe why substances with the same volume or same	
SCI.8.1.1.1.c	mass may have different densities.	Measuring Weather
	Describe how the observed properties of light, sound, and	
	water are related to amplitude, frequency, wavelength, and	
	speed of waves (e.g., color and brightness of light, pitch and	
	volume of sound, height of water waves, light waves are faster	Experiment: Porosity and
SCI.8.1.1.3.a	than sound waves).	Permeability
	Describe how the observed properties of light, sound, and	
	water are related to amplitude, frequency, wavelength, and	
	speed of waves (e.g., color and brightness of light, pitch and	
	volume of sound, height of water waves, light waves are faster	
SCI.8.1.1.3.a	than sound waves).	Water Basics
	Describe how the observed properties of light, sound, and	
	water are related to amplitude, frequency, wavelength, and	
	speed of waves (e.g., color and brightness of light, pitch and	
	volume of sound, height of water waves, light waves are faster	
SCI.8.1.1.3.a	than sound waves).	Water Distribution
	Compare the potential and kinetic energy within a system at	
	various locations or times (i.e., kinetic energy is an object's	
	energy of motion; potential energy is an object's energy of	
SCI.8.1.1.4.a	position).	Project: Mapping
	Compare the potential and kinetic energy within a system at	
	various locations or times (i.e., kinetic energy is an object's	
	energy of motion; potential energy is an object's energy of	
SCI.8.1.1.4.a	position).	Using Geologic Maps
	Compare the potential and kinetic energy within a system at	
	various locations or times (i.e., kinetic energy is an object's	
	energy of motion; potential energy is an object's energy of	
SCI.8.1.1.4.a	position).	Using Topographic Maps
	Explain an inference about whether organisms have a	
	biological relationship or common ancestry based on given	
SCI.8.1.1.6.a	characteristics.	Weathering
	Describe the interactions and influences between two or more	
SCI.8.1.2.1.a	simple systems.	Project: Mapping
	Describe the interactions and influences between two or more	
SCI.8.1.2.1.a	simple systems.	Using Geologic Maps
	Describe the interactions and influences between two or more	
SCI.8.1.2.1.a	simple systems.	Using Topographic Maps
	Explain the transfer and transformations of energy within a	
	system (e.g., conduction and convection of heat [thermal]	
SCI.8.1.2.2.a	energy).	Atmospheric Cycles

ODYSS	SEY WARE [®]	
	Alignment Report for Earth Science	
	Washington - Science - Grades 6-8	
	Explain the transfer and transformations of energy within a	
	system (e.g., conduction and convection of heat [thermal]	
SCI.8.1.2.2.a	energy).	Measuring Weather
	Explain the transfer and transformations of energy within a	
	system (e.g., conduction and convection of heat [thermal]	
SCI.8.1.2.2.a	energy).	Solar Interaction
	Compare the relationships among the components of the solar	
	system (e.g., composition, size, atmosphere, gravity, distance	
SCI.8.1.2.5.a	from the Sun, number of moons).	Atmospheric Cycles
	Compare the relationships among the components of the solar	
	system (e.g., composition, size, atmosphere, gravity, distance	
SCI.8.1.2.5.a	from the Sun, number of moons).	Measuring Weather
	Compare the relationships among the components of the solar	
	system (e.g., composition, size, atmosphere, gravity, distance	
SCI.8.1.2.5.a	from the Sun, number of moons).	Project: Building a Model of the Earth
	Compare the relationships among the components of the solar	
	system (e.g., composition, size, atmosphere, gravity, distance	
SCI.8.1.2.5.a	from the Sun, number of moons).	Project: Scale of the Solar System
	Compare the relationships among the components of the solar	
	system (e.g., composition, size, atmosphere, gravity, distance	
SCI.8.1.2.5.a	from the Sun, number of moons).	Project: Sphere Interaction Lab
	Compare the relationships among the components of the solar	
	system (e.g., composition, size, atmosphere, gravity, distance	
SCI.8.1.2.5.a	from the Sun, number of moons).	Structure of the Sun
	Compare the relationships among the components of the solar	
	system (e.g., composition, size, atmosphere, gravity, distance	The Earth's Place in the Solar
SCI.8.1.2.5.a	from the Sun, number of moons).	System
	Compare the relationships among the components of the solar	•
	system (e.g., composition, size, atmosphere, gravity, distance	
SCI.8.1.2.5.a	from the Sun, number of moons).	The Spheres of Earth
	Describe the life function of specialized cells or tissues (e.g.,	
	blood cells are different from bone cells; leaf tissues capture	
SCI.8.1.2.6.a	the energy from sunlight).	Project: Layers of the Atmosphere
	Describe the life function of specialized cells or tissues (e.g.,	
	blood cells are different from bone cells; leaf tissues capture	
SCI.8.1.2.6.a	the energy from sunlight).	Project: Solar Energy
	Describe the life function of organs or organ systems (e.g., the	
	stomach breaks down food and the intestines absorb food in	
SCI.8.1.2.6.b	the digestive system).	Project: Layers of the Atmosphere
	Explain how physical characteristics of living things can be	
	affected by genetic information and/or by interactions with the	
SCI.8.1.2.7.a	environment (e.g., nutrition, disease, sanitation).	Weathering
	Compare human body systems to another organism's body	
	system (e.g., human lungs to plant leaves, human skeletal or	
SCI.8.1.2.8.b	circulatory systems to plant stems).	Weathering
	Describe how the spin of Earth and other planets accounts for	
SCI.8.1.3.7.a	the length of a day on those planets.	A Unique Planet
	Describe how the spin of Earth and other planets accounts for	
SCI.8.1.3.7.a	the length of a day on those planets.	Project: Earth Comparisons
	Describe how Earth's and other planets' orbits around the Sun	•
SCI.8.1.3.7.b	account for the length of a year on those planets.	Structure of the Sun
	Generate a new question that can be investigated with the	
SCI.8.2.1.1.c	same materials and/or data as a given investigation.	Project: Ice Erosion
SCI.8.2.1.2.a	Make predictions (hypothesize) and give reasons.	Prediction of Volcanoes

Alignment Report for Science 600 Washington - Science - Grades 6-8		
State:	Washington	
Standard:	Grade Level Expectations	
Subject:	Science	
Grade:	Grade 6	
Section	Description	Lesson Title
	Describe how sound waves and/or water waves affect the	
	motion of the particles in the substance through which the	
	wave is traveling (e.g., air molecules vibrate back and forth as	
SCI.6.1.1.3.a	sound waves move through air).	Chemistry
	Describe the behavior of sound and water waves as the	
SCI.6.1.1.3.b	waves are reflected and/or absorbed by a substance.	Atmospheric Lavers
	Describe the behavior of sound and water waves as the	
SCI.6.1.1.3.b	waves are reflected and/or absorbed by a substance.	Chemistry
	Describe the forms of energy present in matter, objects, and	
	systems (i.e., heat [thermal] energy, sound energy, light	
	energy, electrical energy, kinetic energy, potential energy, and	
SCI.6.1.1.4.a	chemical energy).	Atomic Energy
	Describe the forms of energy present in matter, objects, and	
	systems (i.e., heat [thermal] energy, sound energy, light	
	energy, electrical energy, kinetic energy, potential energy, and	
SCI.6.1.1.4.a	chemical energy).	Chemical Energy
	Describe the forms of energy present in matter, objects, and	
	systems (i.e., heat [thermal] energy, sound energy, light	
	energy, electrical energy, kinetic energy, potential energy, and	
SCI.6.1.1.4.a	chemical energy).	Chemistry
	Describe the forms of energy present in matter, objects, and	
	systems (i.e., heat [thermal] energy, sound energy, light	
	energy, electrical energy, kinetic energy, potential energy, and	
SCI.6.1.1.4.a	chemical energy).	Energy Conversion
	Describe the forms of energy present in matter, objects, and	
	systems (i.e., heat [thermal] energy, sound energy, light	
	energy, electrical energy, kinetic energy, potential energy, and	
SCI.6.1.1.4.a	chemical energy).	Mechanical Energy
	Describe the forms of energy present in matter, objects, and	
	systems (i.e., heat [thermal] energy, sound energy, light	
	energy, electrical energy, kinetic energy, potential energy, and	
SCI.6.1.1.4.a	chemical energy).	Our Solar System
	Describe the form of energy stored in a part of a system (i.e.,	-
	energy can be stored in many forms, "stored energy" is not a	
SCI.6.1.1.4.b	form of energy).	Atomic Energy
	Describe the form of energy stored in a part of a system (i.e.,	
	energy can be stored in many forms, "stored energy" is not a	
SCI.6.1.1.4.b	form of energy).	Our Solar System
	Describe the form of energy stored in a part of a system (i.e.,	
	energy can be stored in many forms, "stored energy" is not a	
SCI.6.1.1.4.b	form of energy).	Plant Systems
	Describe how organisms can be classified using similarities	
	and differences in physical and functional characteristics (both	
SCI.6.1.1.6.a	internal and external).	Animals: Response
	Describe how organisms can be classified using similarities	
	and differences in physical and functional characteristics (both	
SCI.6.1.1.6.a	internal and external).	Flower Reproduction

ODYSS	EYWARE [®]	
Alignment Report for Science 600		
	Washington - Science - Grades 6-8	
	Describe how organisms can be classified using similarities	
	and differences in physical and functional characteristics (both	
SCI.6.1.1.6.a	internal and external).	Genetics and Reproduction
	Describe how organisms can be classified using similarities	
	and differences in physical and functional characteristics (both	
SCI.6.1.1.6.a	internal and external).	Mitosis and Meiosis
	Describe how organisms can be classified using similarities	
	and differences in physical and functional characteristics (both	
SCI.6.1.1.6.a	internal and external).	Our Solar System
	Describe how organisms can be classified using similarities	
	and differences in physical and functional characteristics (both	
SCI.6.1.1.6.a	internal and external).	Plants: Tropisms (Part 1)
	Explain how the parts of a system interconnect and influence	
SCI.6.1.2.1.a	each other.	Our Solar System
	Describe and determine the factors that affect heat energy	
	transfer (e.g., properties of substances/materials [conductors,	
SCI.6.1.2.2.a	insulators], distance, direction, position).	Energy Conversion
	Describe and determine the factors that affect heat energy	
	transfer (e.g., properties of substances/materials [conductors,	
SCI.6.1.2.2.a	insulators], distance, direction, position).	Heat Energy (Part 1)
	Describe and determine the factors that affect heat energy	
	transfer (e.g., properties of substances/materials [conductors,	
SCI.6.1.2.2.a	insulators], distance, direction, position).	Heat Energy (Part 2)
	Describe and determine the factors that affect heat energy	
	transfer (e.g., properties of substances/materials [conductors,	
SCI.6.1.2.2.a	insulators], distance, direction, position).	Our Solar System
	Describe how an increase in one type of energy of an object or	
	system results in a decrease in other types of energy within	
	that object or system (e.g., a falling object's potential energy	
SCI.6.1.2.2.b	decreases while its kinetic energy increases).	Atomic Energy
	Describe how an increase in one type of energy of an object or	
	system results in a decrease in other types of energy within	
	that object or system (e.g., a falling object's potential energy	
SCI.6.1.2.2.b	decreases while its kinetic energy increases).	Mechanical Energy
	Describe how an increase in one type of energy of an object or	
	system results in a decrease in other types of energy within	
	that object or system (e.g., a falling object's potential energy	
SCI.6.1.2.2.b	decreases while its kinetic energy increases).	Our Solar System
	Describe how waves transfer energy (e.g., light waves transfer	,
	energy from sun to Earth; air transfers an object's vibrations	
SCI.6.1.2.2.c	from one place to another as sound).	Atmospheric Layers
	Describe how waves transfer energy (e.g., light waves transfer	
	energy from sun to Earth; air transfers an object's vibrations	
SCI.6.1.2.2.c	from one place to another as sound).	Chemistry
	Describe that matter is made of particles called atoms and	
SCI.6.1.2.3.a	molecules.	Matter
	Describe that matter is made of particles called atoms and	
SCI.6.1.2.3.a	molecules.	Molecules and Compounds
	Describe that matter is made of particles called atoms and	
SCI.6.1.2.3.a	molecules.	Project: Atom Diagram

ODYSS	SEY WARE [®]

	Washington - Science - Grades 6-8	
	Describe the flow of mother and energy through a system (i.e.	
SCI 7 1 2 1 a	Describe the now of matter and energy through a system (i.e.,	Eporav Sourcos
301.7.1.2.1.d		
	Describe the flow of matter and energy through a system (i.e.,	
SCI.7.1.2.1.a	energy and matter inputs, outputs, transfers, transformations).	Experiment: Heat Transfer
		· ·
	Describe the flow of matter and energy through a system (i.e.,	
SCI.7.1.2.1.a	energy and matter inputs, outputs, transfers, transformations).	Review
	Describe the components of the Earth's systems (i.e., the	
	core, the mantle, oceanic and crustal plates, landforms, the	
SCI.7.1.2.4.a	hydrosphere and atmosphere).	The Atmosphere
	Describe the components of the Earth's systems (i.e., the	
	core, the mantie, oceanic and crustal plates, landforms, the	The Lludroophere
SCI.7.1.2.4.a	nydrosphere and atmosphere).	The Hydrosphere
	Describe the interactions among the components of Earth's	
	systems (i.e. the core the mantle oceanic and crustal plates	
SCI.7.1.2.4.b	landforms, the hydrosphere and atmosphere).	The Atmosphere
	Describe the interactions among the components of Earth's	
	systems (i.e., the core, the mantle, oceanic and crustal plates,	
SCI.7.1.2.4.b	landforms, the hydrosphere and atmosphere).	The Hydrosphere
	Describe how forces acting on an object may balance each	
	other (e.g., the downward force of gravity on an object sitting	
SCI.7.1.3.1.b	on a table is balanced by an upward force from the table).	Newton's Laws of Motion
	Describe how an unbalanced force changes the speed and/or	
	line. 2nd Law of Motion (a g. a larger unbelanced force is	
	needed to equally change the motion of more massive	
SCI 7 1 3 2 a	objects)	Newton's Laws of Motion
001.7.1.0.2.a	Describe how an unbalanced force changes the speed and/or	
	direction of motion of different objects moving along a straight	
	line, 2nd Law of Motion (e.g., a larger unbalanced force is	
	needed to equally change the motion of more massive	
SCI.7.1.3.2.a	objects).	Project: Newton's Laws
	Describe how frictional forces act to stop the motion of	
SCI.7.1.3.2.b	objects.	Force
	Investigate and describe the balanced and unbalanced forces	
	acting on an object (e.g., a model car speeding up on a table	
	has both an unbalanced force pulling it forward and a	
0017400	gravitational force pulling it down balanced by the table	
SCI.7.1.3.2.C	pusning upward).	Newton's Laws of Motion
	acting on an object (or a model car speeding up on a table	
	has both an unbalanced force pulling it forward and a	
	aravitational force pulling it down balanced by the table	
SCI 7 1 3 2 c	pushing upward).	Project: Newton's Laws
001.7.1.0.2.0	Investigate and describe pressure differences that result in	
	unbalanced forces moving objects (e.g., pressure differences	
	cause forces that move air masses, move blood through the	
SCI.7.1.3.2.d	heart, cause volcanic eruptions).	Newton's Laws of Motion

	Alignment Report for Science 700		
	Washington - Science - Grades 6-8		
	Investigate and describe pressure differences that result in		
	unbalanced forces moving objects (e.g., pressure differences		
	cause forces that move air masses, move blood through the		
SCI.7.1.3.2.d	heart, cause volcanic eruptions).	Project: Newton's Laws	
	Observe and describe evidence of physical and chemical		
	changes of matter (e.g., change of state, size, shape,		
SCI.7.1.3.3.a	temperature, color, gas production, solid formation, light).	Experiment: Chemical Reactions	
	Observe and describe evidence of physical and chemical		
	changes of matter (e.g., change of state, size, shape,		
SCI.7.1.3.3.a	temperature, color, gas production, solid formation, light).	Heat	
	Observe and describe evidence of physical and chemical		
	changes of matter (e.g., change of state, size, shape,		
SCI.7.1.3.3.a	temperature, color, gas production, solid formation, light).	Light	
	Observe and describe evidence of physical and chemical		
	changes of matter (e.g., change of state, size, shape,		
SCI.7.1.3.3.a	temperature, color, gas production, solid formation, light).	States of Matter	
	Observe and describe that substances undergoing physical		
	changes produce matter with the same chemical properties as		
	the original substance and the same total mass (e.g., tearing		
	paper, freezing water, breaking wood, sugar dissolving in		
SCI.7.1.3.3.b	water).	Gravity	
	Observe and describe that substances may react chemically		
	to form new substances with different chemical properties and		
	the same total mass (e.g., baking soda and vinegar; light stick		
SCI.7.1.3.3.c	mass before, during, and after reaction).	Chemical Application	
	Observe and describe that substances may react chemically		
	to form new substances with different chemical properties and		
	the same total mass (e.g., baking soda and vinegar; light stick		
SCI.7.1.3.3.c	mass before, during, and after reaction).	Chemical Reactions	
	Observe and describe that substances may react chemically		
	to form new substances with different chemical properties and		
	the same total mass (e.g., baking soda and vinegar; light stick		
SCI.7.1.3.3.c	mass before, during, and after reaction).	Energy Transformation	
	Observe and describe that substances may react chemically		
	to form new substances with different chemical properties and		
	the same total mass (e.g., baking soda and vinegar; light stick		
SCI.7.1.3.3.c	mass before, during, and after reaction).	Review	
	Describe the processes by which soils are formed (e.g.,		
SCI.7.1.3.4.a	erosion and deposition in river systems).	Destructive Forces	
	Describe the processes by which soils are formed (e.g.,		
SCI.7.1.3.4.a	erosion and deposition in river systems).	Pathogens	
	Describe how heat (thermal) energy flow and movement		
	(convection currents) beneath Earth's crust cause		
SCI.7.1.3.4.b	earthquakes and volcanoes.	The Lithosphere	
	Describe how constructive processes change landforms (e.g.,		
	crustal deformation, volcanic eruption, deposition of		
SCI.7.1.3.4.c	sediment).	Constructive Forces	
	Describe how constructive processes change landforms (e.g.,		
	crustal deformation, volcanic eruption, deposition of		
SCI.7.1.3.4.c	sediment).	Destructive Forces	
	Describe how destructive processes change landforms (e.g.,		
SCI.7.1.3.4.d	rivers erode landforms).	Destructive Forces

SCI 8 1 1 1 h	measured anywhere in the universe at any normal speed	Stars	
001.0.1.1.1.0	Describe why substances with the same volume or same		
SCI.8.1.1.1.c	mass may have different densities.	Density	
	Describe why substances with the same volume or same		
SCI.8.1.1.1.c	mass may have different densities.	Measurement: Volume	
	Describe the volumetric properties of solids, liquids, and gases		
SCI.8.1.1.1.d	(e.g., a gas has the same volume as its container).	Experiment: Mass of Gas	
	Describe the volumetric properties of solids, liquids, and gases		
SCI.8.1.1.1.d	(e.g., a gas has the same volume as its container).	Measurement: Volume	
	Describe the volumetric properties of solids, liquids, and gases		
SCI.8.1.1.1.d	(e.g., a gas has the same volume as its container).	Structure of Matter	
	Describe the volumetric properties of solids, liquids, and gases		
SCI.8.1.1.1.d	(e.g., a gas has the same volume as its container).	Volume	
	Explain the transfer and transformations of energy within a		
	system (e.g., conduction and convection of heat [thermal]		
SCI.8.1.2.2.a	energy).	Nuclear Power	
	Explain the transfer and transformations of energy within a		
	system (e.g., conduction and convection of heat [thermal]	Turbidity, Sedimentation, and	
SCI.8.1.2.2.a	energy).	Currents	
	Compare the relationships among the components of the solar		
	system (e.g., composition, size, atmosphere, gravity, distance	A strong my and Magging mont	
SCI.8.1.2.5.a	from the Sun, number of moons).	Astronomy and Measurement	
	compare the relationships allong the components of the solar		
SCI 81252	from the Sun, number of moons)	Measuring the Universe	
501.0.1.2.3.a	Compare the relationships among the components of the solar		
	system (e.g. composition size atmosphere gravity distance		
SCI 8125a	from the Sun number of moons)	Project: The Moon and Tides	
o onion niziona	Compare the relationships among the components of the solar		
	system (e.g., composition, size, atmosphere, gravity, distance		
SCI.8.1.2.5.a	from the Sun, number of moons).	Science and Space	
	Compare the relationships among the components of the solar	•	
	system (e.g., composition, size, atmosphere, gravity, distance		
SCI.8.1.2.5.a	from the Sun, number of moons).	The Biosphere	
	Describe the life function of specialized cells or tissues (e.g.,		
	blood cells are different from bone cells; leaf tissues capture		
SCI.8.1.2.6.a	the energy from sunlight).	Photosynthesis and Food	

ODYSS	EYWARE [®]	
Alignment Report for Science 800		
	Washington - Science - Grades 6-8	
	Describe relationships among the organ systems of the	
	human body (e.g., the role of the senses and the nervous	
	system for human survival, the relationships between the	
SCI.8.1.2.8.a	digestive and excretory systems).	Population and Environment
	Compare human body systems to another organism's body	
	system (e.g., human lungs to plant leaves, human skeletal or	
SCI.8.1.2.8.b	circulatory systems to plant stems).	Photosynthesis and Food
	Generate a new question that can be investigated with the	
SCI.8.2.1.1.c	same materials and/or data as a given investigation.	Project: Marine Report
	Generate a new question that can be investigated with the	
SCI.8.2.1.1.c	same materials and/or data as a given investigation.	Project: Reactors
SCI.8.2.1.2.a	Make predictions (hypothesize) and give reasons.	Experiment: Mass of Gas
SCI.8.2.1.2.b.1	prediction (hypothesis)	Experiment: Mass of Gas
SCI.8.2.1.2.b.5	responding (dependent) variable	Measurement: Area
SCI.8.2.1.2.D.5	responding (dependent) variable	Measurement: Size and Distance

	Correlate Earth's surface features to observable weather	
SCI.9.1.2.4.c	patterns (e.g., rain shadow, deserts, rain forest).	Weather and Climate
	Explain that the strength of a gravitational force between two	
	objects depends on the mass of the objects and the distance	
SCI.9.1.3.1.e	between the objects.	Ability To Orbit
	Describe the balanced forces acting on an object moving at a	
	constant speed along a straight line 1st Law of Motion (e.g. a	
	car traveling at a constant speed of 60 mph on a straight	
	freeway has a force pushing it forward balanced by frictional	
SCI 9132a	forces acting in the opposite direction)	Ability To Orbit
	Explain how unbalanced forces change the speed and/or	
	direction of motion of different objects moving along a straight	
	line. 2nd Law of Motion (e.g., a 2-kg object needs twice the	
	unbalanced force to speed up the same amount as a 1-kg	
SCI.9.1.3.2.b	object).	Ability To Orbit
	Investigate and describe that forces always some in pairs. 2rd	
	Law of Motion (o.g., pull a spring scale against another spring	
	scale as water blasts out of a bottle rocket two forces act - a	
SCI 9 1 3 2 c	force on the water and an equal force on the rocket)	Ability To Orbit
001.3.1.0.2.0		
	Investigate and describe that forces always come in pairs, 3rd	
	Law of Motion (e.g., pull a spring scale against another spring	
	scale, as water blasts out of a bottle rocket two forces act - a	
SCI.9.1.3.2.c	force on the water and an equal force on the rocket).	Project: Newton's Law
	Investigate and analyze the effect of different factors on the	
	rate of a physical and chemical change (e.g., temperature,	
SCI.9.1.3.3.a	surface area, pressure, catalysts).	Alternate Project: Temperature
	Recognize and explain that the rate of radioactive decay of a	
	substance is constant, not affected by any factors (e.g., the	
	half-life of a radioactive substance is constant over a long time	Alexal de Detien
SCI.9.1.3.3.d	and a wide range of conditions found on Earth).	Absolute Dating
	Describe the processes that cause the movement of material	
	In Earth's systems (e.g., pressure differences that cause	
SCI 0 1 3 4 5	currents: crossion and deposition)	A Unique Planet
301.9.1.3.4.a	Describe the processes that cause the movement of material	
	in Earth's systems (e.g., pressure differences that cause	
	convection resulting in winds, mantle movement, and ocean	
SCI 9134a	currents: erosion and deposition)	Continental Drift
001.0.1.0.1.0	Describe the processes that cause the movement of material	
	in Earth's systems (e.g., pressure differences that cause	
	convection resulting in winds, mantle movement, and ocean	
SCI.9.1.3.4.a	currents; erosion and deposition).	Currents
	Describe the processes that cause the movement of material	
	in Earth's systems (e.g., pressure differences that cause	
	convection resulting in winds, mantle movement, and ocean	
SCI.9.1.3.4.a	currents; erosion and deposition).	Erosion
	Describe the processes that cause the movement of material	
	in Earth's systems (e.g., pressure differences that cause	
	convection resulting in winds, mantle movement, and ocean	
SCI.9.1.3.4.a	currents; erosion and deposition).	Groundwater

The Atomic Model Describe the relative charges, masses, and locations of the SCI.9-12.4.9-11 PS2A.1 protons, neutrons, and electrons in an atom of an element. The History of Atomic Theory Given the number and arrangement of electrons in the outermost shell of an atom, predict the chemical properties of Archimedes' Principle and Flotation SCI.9-12.4.9-11 PS2B.1 the element. Given the number and arrangement of electrons in the outermost shell of an atom, predict the chemical properties of SCI.9-12.4.9-11 PS2B.1 the element. Experiment: Kepler's Second Law Given the number and arrangement of electrons in the outermost shell of an atom, predict the chemical properties of Experiment: Water Acidity and the SCI.9-12.4.9-11 PS2B.1 the element. Environment Given the number of protons, identify the element using a SCI.9-12.4.9-11 PS2C.1 Periodic Table. The Periodic Table Given the number of protons, identify the element using a SCI.9-12.4.9-11 PS2C.1 Periodic Table. Trends on the Periodic Table Explain the arrangement of the elements on the Periodic Table, including the significant relationships among elements SCI.9-12.4.9-11 PS2C.2 in a given column or row. The Periodic Table Explain the arrangement of the elements on the Periodic Table, including the significant relationships among elements SCI.9-12.4.9-11 PS2C.2 in a given column or row. Trends on the Periodic Table Explain how ions and ionic bonds are formed (e.g., sodium atoms lose an electron and chlorine atoms gain an electron, then the charged ions are attracted to each other and form SCI.9-12.4.9-11 PS2D.1 bonds). **Electric Charges** Explain the meaning of a chemical formula for an ionic array SCI.9-12.4.9-11 PS2D.2 (e.g., NaCl). Compounds Give examples to illustrate that molecules are groups of two or more atoms bonded together (e.g., a molecule of water is formed when one oxygen atom shares electrons with two SCI.9-12.4.9-11 PS2E.1 hydrogen atoms). The Atomic Model Explain the meaning of a chemical formula for a molecule SCI.9-12.4.9-11 PS2E.2 (e.g., CH4 or H2O). Compounds Describe at least three chemical reactions of particular importance to humans (e.g., burning of fossil fuels, SCI.9-12.4.9-11 PS2G.1 photosynthesis, rusting of metals). Atomic Structure and Bonding Describe at least three chemical reactions of particular importance to humans (e.g., burning of fossil fuels, Chemical Reactions and SCI.9-12.4.9-11 PS2G.1 photosynthesis, rusting of metals). Conservation of Mass
